Machine Type:

CLAMP RACK

Model Numbers:

A-CRFR-08, B-CLMP-3.5-32-CR

Description:

8' width capacity, 6-row (3 rows on each side) Clamp Rack with (16) heavy-duty, zinc-plated, hand-tightened clamps. Clamps are 32" opening (40" opening is available), with 3.5" high x 4.75" wide jaws, with 1° inward draft.

Standard features include super heavy-duty frame with 4" x 4" structural tubing cross beams, 4" x 6" structural tubing legs, and 4" x 4" structural tubing feet. Two-position feet can be configured for one-sided or two-sided Rack operation. All tubing ends are angled and/or closed for maximum strength and proper aesthetics. High-quality urethane finish. Clamps are exceptionally heavy-duty, with full box frame construction, and feature quick-release rear jaws and long, smooth handles for maximum ease-of-use.

Dimensions:

8' 8"W x 5'D x 6.5'H

Weight:

Net: 880 lbs.; Shipping: 990 lbs. (compare!)

Electrical Requirements:

None

Air Requirements:

None

Price (U.S. Dollars):

\$3,436.00 f.o.b. Los Angeles, CA
(additional clamps \$96.00 each)

Clamp Rack

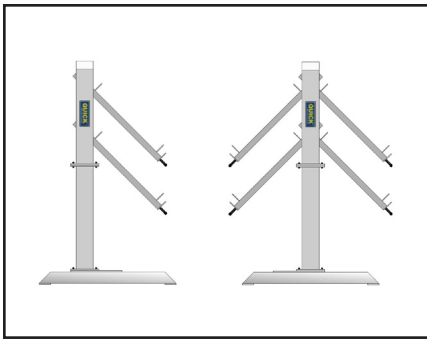

Exceptionally High-Quality Clamping

The QUICK Clamp Rack's moderate cost, ultra high-quality clamps, super-strong frame and efficient use of floor space makes it the ideal gluing station for the small to mid-sized cabinet shop, furniture manufacturer or millwork producer.

Innovative Design, Massive Frame

The QUICK Clamp Rack features a cleanly-designed, exceptionally strong frame, with massive 4" x 4" structural tubing cross beams and feet, and 4" x 6" structural tubing legs.

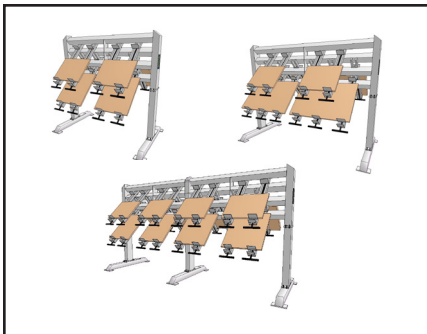

The innovative "two-sided" frame design allows for either one-sided or two-sided operation, at the shop owner's discretion. The one-sided configuration allows for placement of the frame tightly against a wall, for maximum compactness. The two-sided configuration doubles the amount of easily-accessible clamping area, for industry-leading "room to work." The Rack is configured by choosing either of the two available foot mounting positions.

Clamps hang at an ergonomically ideal and floor-space-saving 45-degree angle, and are easily lifted out of the frame and moved from row to row as needed. The frame has six rows (three on each side), and clamps can be installed on all six rows. However, for optimum working room, we recommend leaving a one-row space between the working rows.

Super Heavy-Duty Clamps

QUICK clamps are, by a considerable margin, the heaviest-duty and highest-quality clamps available to the woodworking industry. Each clamp weighs 30 pounds, and features full box-frame construction, zinc plating to minimize corrosion, 3.5" high jaws, quick-adjusting rear jaws, and long, smooth, easy-on-the-hands handles.

Three Frame Widths to Choose From

The QUICK 8' wide Clamp Rack with 16 clamps (\$3,436.00 with 32" clamps; \$3,532.00 with 40" clamps) is our most popular package. We also offer a 12' wide Rack with 24 clamps (\$4,904.00 with 32" clamps; \$5,048.00 with 40" clamps). Additional clamps (\$96.00 each for 32"; \$102.00 each for 40") are readily available and can be added at any time.

For extra-long-length gluing, two Racks can be placed side-by-side.
