Fax: (866) 399-1308

Machine Type:

TABLE-TOP GLUE APPLICATOR

Model Number:

F-TTGA-12

Description:

Table-Top Glue Applicator with 6" diameter, 12" wide grooved rubber roll, powered by 1/4 horsepower electric motor.

Designed for use with all water-based PVA (white or yellow) woodworking glues. Ideal for use with smaller (6-section) Clamp Carriers.

Glue is applied to either the edges or to the faces of stock by running the stock over the glue roll as it turns. The roll turns in a stainless steel glue pan, where it picks up the glue to be applied. An adjustable stainless steel doctor blade constantly wipes excess glue from the roll, allowing for precise adjustment of the glue spread thickness.

The glue pan/glue roll assembly and doctor blade are removable for easy cleaning.

Dimensions:

32"W x 13"D x 9"H

Electrical Requirements:

110V, single-phase

Air Requirements:

None

Price (U.S. Dollars):

\$1450.00 f.o.b. Los Angeles, CA; optional SS Cover \$195.00
